and Dozier (1983) further defined public relations as being “concerned with rela-tions with numerous publics, that like consumers, affect organizational survival and growth” (p. 6). Coombs (2001, p. 106; see also Health, 2000) defined public relations as “the use of communication to manage the relationship between an organization and guide the actions and strategies that public health actors can use to influence public policy. To this end, we will provide some insights on how public health actors can use the punctuated equilibrium model to analyze situations and identify opportune moments and strategies for acting upon policies. Description of the model. The initial observation of Frank R. Baumgartner and ... The safety net consists of public hospital systems; academic health centers; community health centers or clinics funded by federal, state, and local governmental public health agencies (see Chapter 3); and local health departments themselves (although systematic data on the extent of health department services are lacking) (IOM, 2000a).
